Charlie Groves's Resume

c@sevorg.org

Professional Experience

Principal Engineer, Datavant (2022 - 2026)

- Initiated and led engineering work to convert $1B/year in billing from macro-laden spreadsheets and stored procedures to auditable, automated, reliable systems.
- Created an AsyncAPI-based generator for type-safe event clients and servers, and the Terraform to create their infrastructure.
- Launched an LLM-based system to intake millions of faxed medical request letters per year, extracting patient and requester data from unstructured PDFs.

Senior Staff Engineer, States Title (now Doma) (2017 - 2021)

- Started a platform engineering group with developer experience, quality, security, and platform teams.
- Created the Durham engineering office, hiring and managing the initial team there.
- Ran the escrow half of our title agency as we hired in title professionals.
- Built our first product, an underwriter, with two other engineers.

Principal Engineer, Fitbit (2013 - 2017)

- Started the developer productivity team, and led the team in scaling our builds, releases, and testing.
- Led technical work on Fitbit Challenges.
- Scaled step leaderboards to an order of magnitude more users while lowering 99th percentile latency.

Member, Senior Software Engineer, Plausible Labs Cooperative (2012 - 2013)

- Built the 1.0 of an iOS streaming music player, Piki, with two other engineers.

Senior Software Engineer, Three Rings Design (2007 - 2012)

- Designed server architecture and led team in the creation of a now defunct Doctor Who MMO.
- Wrote a network subsystem and various game functionality for Corpse Craft for iPad.
- Orchestrated async client-server interactions and designed user interfaces for Puzzle Pirates.

Software Engineer, University of South Carolina (2002 - 2007)

- Led development of REV, a web-based earthquake data viewer.

Open Source Experience

- Wrote ate, a terminal pager that navigates hyperlinks.
- Restarted Jython development and made the first major release in nearly 6 years.

Education

B.S. in Computer Science, University of South Carolina (2000 - 2005)
